BRYAN MAKES FOUR SPEECHES

To the Democracy of New Haven and Bridgeport.

ATTENDS TWO RECEPTIONS

Although There Was an Absence of Street Decorations In the Connecticut Towns, He Was Everywhere Accorded a Hearty Reception-Returns to New York.

New Haven, Conn., Sept. 1.-Under pleasant skies William Jennings Bryan came to Connecticut, and his hurried visit must have strongly reminded him of the strenuous days during his presidential campaigns, for he delivered four addresses, each of considerable length, attended two receptions, and was the center of handshaking bees whenever his admirers could reach him. Everywhere he was heartily received, although there was an absence of street demonstrations both here and in Bridgeport. His audiences, however, were wildly enthusiastic, especially at the noon luncheon here. The features of the day were the luncheon and the conference of New England Democrats. At the former Mr. Bryan was welcomed to the city and state, and at the latter he stood before a representative body of New England Democrats and with great earnestness spoke of the problems which the party must face in the coming campaigns. Mr. Bryan said in the course of his address that New England never had been a "good breeding place for Democracy; Jefferson had never so considered it; neither did Jackson."

A delay at the start of Mr. Bryan's trip caused an overlapping of the three meetings here to the disappointment of many. The mass meeting on the green had to be started before the luncheon was over, and Democratic conference was not completed until it was time for Mr. Bryan to deliver his third address. The chief change in the program was the Inclusion of ex-Governor Garvin of Rhode Island as one of the open-air speakers.

Mr. Garvin spoke at the luncheon, paying a tribute to the uprightness of Mr. Bryan.

Mr. Bryan left, New Haven for Bridgeport shortly before 6 o'clock, addressing an audience at the Armory in the evening. His addresses at the mass meetings were along the lines of his speech at Madison Scuare Garden. Today Mr. Bryan will return to New York. Most of the members of his party who were with him left for their homes.

BUSINESS BOOMING

Dun & Company Report a Very Encouraging Outlook.

New York, Sept. 1 .- In their weekly review of trade R. G. Dun & Company say:

No check to commercial progress can be discerned, while the outlook becomes brighter each week through most encouraging crop reports. Jobbing trade is on a large scale, wholesale business is much better than last year, and after the holiday retail distribution of fall merchandise promises to be very heavy. Manufacturing reports are gratifying beyond precedent, the textile industries alone showing any irregularity. As to cotton goods there is a natural disposition to delay placing orders when better terms seem warranted by the cheapenedraw material, but producers make no concessions because of contracts on hand. Woolen goods also hesitate pending a more definite trend in the distributing markets. These uncertainties apply to future business, current trade being of good volume. Higher prices for pig iron emphasize the inadequacy of furnace output, steel mills being embarrassed by lack of material. Similar conditions prevall in the footwear industry, the average of hide prices now eclipsing all previous records. Lower prices for farm staples testify to the certainty of ample crops, which in turn give promise of more liberal exports.

The Stranded Manchuria.

Honolulu, Sept. 1.-Soundings show that at low tide there is only ten feet of water on the Marchuria's starboard side. It is reported that there is five feet of water in her hold and that she has sustained structural damage along the lines of her bilge and keel. The 2,500 tons of coal she has on board will be jettisoned. Captain Metcalf has engaged a dredger for use in case it should be needed. He says he does not expect to float the steamer in less than two weeks.

Refuses to Disclose Identity. St. Petersburg, Sept. 1. - Premier Stolypin has taken up his residence at the winter palace in the quarters formerly occupied by Count Witte. The woman who assassinated General Min still refuses to disclose her identity, but she admits that her pass-

port is false. · . . Soap Factory Burned. micago, Sept. 1.-The plant of Gramam Brothers and company, soap manufacturers, was destroyed by fire.

Loss, estimated at \$125,000, is covered by insurance.

Coming to United States. Bialystok, Sept. 1. - Many prominent Jewish anarchists have left this sity for the United States.

OHIO OLIO,

What's Doing in the Buckeye State, Burton Accepts. Cleveland, O., Sept. 1. - Congress-

man Theodore E. Burton, in an interview, replies to the recent statements of Senators Dick and Foraker and accepts the challenge of the former for a discussion in the coming Ohio state Republican convention of certain measures pending in the last congress, and upon which there was a difference of opinion among Ohio senators and members of congress. Congressman Burton accepts the challenge of Senator Dick for action by the whole convention on the sub ject of the railroad rate bill, the ship subsidy bill, the Philippine tariff, the enlargement of the navy, and the place of purchase of supplies for the Panama canal. In addition he declares that the convention should favor a state primary election law and the nomination of state officials and United States senators by popular

Pioneer In Lumber Trade.

Celevalnd, O., Sept. 1 .- George W Pack, one of the pioneers in the lum ber trade of the northwest and formerly a resident of this city, died at his summer home at Southampton, L I. Mr. Pack had practically made his home at Ashville, N. C., since 1885, and out of his large fortune, estimated at more than a million dollars, contributed to many public enterprises in that city.

Death Claims Two.

Marietta, O., Sept. 1 .- Death claimed two prominent men of southeastern Ohio. L. W. Ellingwood of this city. widely known as a lawyer and Democratic politican, died here after a long illness. Judge Jesse W. Hollingsworth, presiding judge of the common pleas court in Belmont county and widely known over the state, died in St. Clairsville, near here.

Toledo Machinists Strike. Toledo, O., Sept. 1.-Three hundred men are out at the Pope Motor Car company's plant because they claim a member of the machinists' union was discharged because he joined the union. This the management denies. The union threatens to call out all their men in the city, 1,000 in all, unless the discharged man is reinstated. Rescuer Also Overcome.

Akron, Sept. 1 .- John Kane and George Haviland, city employes, were overcome by gas in a sewer here. Kane died in a few minutes after being removed by men who let Haviland into the sewer to rescue Kane, but who was also overcome. Haviland's recovery is doubtful.

Poisoned by Tainted Meat. Lorain, O., Sept. 1.-Joseph Meyers and his four children were made dangerously ill by eating Hamburg steak, which was found to be spoiled. Only by the timely work of a physician were their lives saved. One of the children is still in a serious condition.

Attempt to Wreck Train. Upper Sandusky, O., Sept. 1.—As a Northern Ohio passenger train was approaching Sycamore a track walker found a pile of stones and iron on the track. The police believe an attempt was made to wreck the train, and are conducting an investigation.

Headgear Basis of Insanity Charge. Cleveland, O., Sept. 1 .- Because she paid \$25 for a spring bonnet, although she is possessed of \$30,000 in her own right and is heir to \$50,000 from her grandmother's estate, an effort is being made to prove Mrs. Philip Ponsson, wife of an architect, insane.

Killed by Playmate.

Marietta, O., Sept. 1.-Geo. Smith, aged 14, was shot and killed by his playmate, Charles English, at Bloomfield. They were hunting and Ezgstarted in pursuit, in the head.

Prisoners to Be Released. Columbus, O., Sept. 1.—Ten secondterm prisoners and four third termers will be released from the penitentiary during the month of September. Ali are men of long criminal history. In all there will be 56 prisoners released. three of whom are women.

Fatal Crossing Accident,

Fostoria, Sept. 1.-Lake Erie and Western train No. 2 struck a buggy at a crossing eight miles west of here, instantly killing Mrs. Shary, a widow, aged about 70, and fatally injuring her daughter, Mrs. J. Hanna, aged 40, wife of an oil pumper.

Still in Matrimonial Ring. Lima, O., Sept. 1 .- James Yoakum, aged 84, secured a license to well Mrs. Anna Brown, aged 66. It is his

third venture and her second.

Treasury Statement. Washington, Sept. 1. - The statement of the treasury balances in the general fund, exclusive of the \$150,-000,000 gold reserve, shows available cash balance \$200,361,692; gold coin and bullion, \$111,571,308; gold cer-

tificates, \$49,389,570. Charleston in Port. Santiago, Chile, Sept. 1.-The United States cruiser Charleston, with Secretary of State Root and party on board, has anchored at Lota.

UPRISING IN THE PROVINCES

Causes Grave Concern to the Government of Cuba.

SANTIAGO BECOMING UNEASY

Americans Fear an Insurrection in Guerra, but So Far In the Chase Have Been Unable to Catch Him.

Havana, Sept. 1.-With the discouraging news from Santiago the situation is darker than at any previous time since the insurrection broke out. News of an uprising in Santiago province, while not yet published here, is spreading about the city and causing the gravest concern. When Mr. Sleeper, the American charge, was told the contents of the Associated Press Santiago dispatch he endeavored to verify it through the state department, but was told that it was untrue Subsequently the dispatch was verified from private and newspaper sources. The extent of the rising in Santiago is not known, but it is the opinion here that the worst calamity of all to the Palma government would be an insurrection in eastern Cuba.

According to two eye witnesses Cardenas, which has been considered a peaceful city, was the scene Thursday of desultory fighting between police and rural guards on the one side. and roving insurgents on the other.

The only province remaining perfeetly peaceful is Puerto Principe. Americans having cattle are apprehensive that this field may become a scene of insurrectionary operations.

The troops in the western portion of Pinar del Rio province have not yet come up with Pino Guerra, and there is no present likelihood of their doing so, as the troops might march ten years and all the while Guerra would still be just ahead of them in the hills. There are thousands of mountain trails with which the insurgents are familiar and which lead in all directions. If Guerra cared to harrass the government their troops could be killed off by sharpshooters. The government has no cavalry at Pinar del Rio and the only real soldiers are the artillerymen, but as they are often afoot they cannot cope with does not want to fight. His scouts can always be seen at a distance from Pastorius, Eason and Ritter. the government line of march.

Americans who come to the legation to ask protection for property are inswered by an immediate call upon the government of Cuba, which promises to do the best it can for them. Charge d'Affaires Sleeper advises all such callers to file their complaints in the local courts and forward copies of papers to the legation. There are many rumors in circulation as to what may happen Sept. 15 unless a new election is granted.

New Jan Line of Steamers.

Victoria, B. C., Sept. 1.-The steamer Tartar, from the Orient, brought news that the Japanese government proposes to subsidize a steamship line to connect Daluy with the north Pacific coast of the United States, and also Shanghai and Vladivostok. The south Manchurian Railroad company, practically a government concern, will spend \$5,000,000 in constructing steamers in Japan for this purpose, and arrangements have been made for an expenditure of \$50,000,000 for the improvement of the railway system between Dalny and Chang Chun.

Murdered by Countrymen.

Lancaster, Pa., Sept. 1.-Placiti Albanese, an Italian repairman on the Pennsylvania railroad, was murdered in his shanty lodgings near Gap, Pa., lish starting up a rabbit, shot, hitting | in the presence of 15 of his country-Smith, who in his excitement had men. The sixteen men were asleep when four Italians entered, and while one stood guard at the door the others, with drawn revolvers and stilettos, proceeded to rob the men. All submitted without resistance except

Law Unconstitutional.

Montgomery, Ala., Sept. 1.—United States Commissioner Elmore held the Erdman law of congress unconstitutional and discharged Frank Young, a dispatcher of the Louisville and Nashville railroad, from custody. Young had been charged with violating the law in discharging members of the Order of Railroad Telegraphers in the employ of the road.

Insurgents Defeated.

Cape Haytien, Hayti, Sept. 1 .- Advices received here from Santo Domingo say that the insurgents have been defeated with severe loss. At | Monte Christi, on the north coast, General Kamacho is besieged by revolutionists in an entrenched position and is awaiting the arrival of re-en- | Sheep and Lambs - Sheep, \$3 00@5 50; forcements by sea.

The Decline of Chivalry, Wife (drearily)-Ab, me! The days of chivalry are past. Husband-What's the matter now? Wife-Sir Walter Raleigh laid his cloak on the ground for Queen Elizabeth to walk over, but you get mad simply because poor, dear mother sat down on your hat.

GOOD RECORDS

The Massillon Independent.

Made by Ohio Men in Shooting Tournament at Seagirt, Seagirt, N. J., Sept. 1 .- Under al-

most cloudless skies and in the presence of thousands of spectators important matches were decided in the national military shooting tournament here. In the regimental team match the condition were ten shots for each man at each range of 200, 600 and 1,000 yards. First prize was won by the Sixth Massachusetts with 772 out of a possible 900; second prize went to the Second Ohio, with 758; third to the first team, marine corps, 731. the Province of Puerto Principe, and fourth to the Seventy-first New Government Troops Pursuing Pino | York, 730. The United States marine corps' first team was fifth and the Second Minnesota sixth. The Wimble don cup match for the long range championship, each competitor firing ten shots at 1,000 yards, was won by Captain J. S. Simon of the Ohio National Guard with a score of 48 out of a possible 50; second was won by Lieutenant Benedict of Ohio, 46 points; third by Sergeant Orr of Ohio, 45, and fourth by Captain H. M. Dell of New Jersey, 45 points.

species of insanity? Ethel-Sometimes. Who has been falling in love with you? -Smart Set.

SHIP STRIKES ON THE ROCKS

United States Transport Sheridan In a Dangerous Position.

MANY PASSENGERS ABOARD

In Attempting to Make a Landing the Second Officer's Boat Swamped In the Breakers, but the Crew Got Safely Ashore-Vessel's Supply of Coal is Thrown Overboard.

Honolulu, Sept. 1 .- A wireless message reports the United States army transport Sheridan ashore on Barber's point, the southwestern extremity of the island of Oahu, on which this city is located.

The second officer of the Sheridan has come ashore. His boat was swamped in the breakers but its crew landed safely. Captain Peabody has signalled the steamer Caldine to take her passengers to Honolulu. If possible the transfer will be made at once, the revenue cutter Manning assisting. The report that the Sheridan's machinery broke down before the vessel struck is denied. The Sheridan is now hanging on a rock amidships with deep water all around.

The Sheridan's engines are being repaired and coal is being, thrown overboard An effort to float her will be made at high tide this afternoon. Captain Peabody is quoted to have assumed all responsibility for the accident, saving that the vessel was in too close. The Sheridan has aboard 125 through passengers and fifty soldiers.

It is thought that many, if not all, of the Sheridan's passengers will be obliged to spend the night aboard the steamer. Only two boats have reached shore, and one of these was badly smashed. A wireless message has been sent for another steamer to assist in taking the passengers off. The surf is heavy and the transfer of passengers will be difficult.

EXCITEMENT

In Japan Caused by Killing of Seal Poachers.

Victoria, B. C., Sept. 1.-The steamer Tartar, from China and Japan, brought news that the killing of the five Japanese seal poachers at Prybiloff islands had caused great excitement in Japan and that the press is devoting columns to the affair. One of the schooners engaged in the affair arrived at Azushi, Hokkaido, shortly before the Tartan sailed, and her officers were instructed to report the occurrence to the government. Some of the papers quoted an unnamed Japanese sealing authority as saying: "In 1901 some Americans, prohibited from sealing under their own flag, started the practice of poaching under the Japanese flag with the assistance of Japanese sailors. Whether the Japanese who were killed or imprisoned were employed by Americans or were acting independently is still uncertain, and it is not clear that the killing was justified."

Directors Held No Meetings.

Philadelphia, Sept. 1. - Additional developments, sensational in character, continue to crop out in connection with the Real Estate Trust company. It became known publicly for the first time since the suspension of the trust company that there had not been a meeting of the directors of the failed bank for nearly three years, every detail being left to the late president, Frank K. Hipple. It was this which caused the Clearing House association to hesitate about coming to the aid of the company.

Bryan and Hearst Accept.

Roanoke, Va., Sept. 1 .- W. J. Bryan and W. R. Hearst have accepted invitations to attend the district fair to be held at Radford, Va., the second week in September. This news was conveyed in a telegram received here from former Governor J. Hoge Tyler of Virgina, who is now in New York. Mr. Tyler went to New York to attend the Bryan reception and to extend an invitation to the Nebraskan on behalf of Radford to visit the exhibition.

Died of His Injuries. St. Petersburg, Sept. 1.-Prince

Shakoffskoi, a cousin of the secretary of the outlawed parliament, who, with M. Polivanoff, was conversing with Premier Stolypin at the moment of the explosion in the latter's apartments, Aug. 26, died at midnight of his wounds.

St. Petersburg, Sept. 1. - Emperor Nicholas bestowed presents in recognition of the defense of Russian interests and the care of sick and wounded in Japan during the war upon M. Karmand, the French minister at Tokyo, and a Mr. Powers, an American.

Czar Bestows Presents.

An Economical Place. Short-I say, old man, will you lend me \$5 for an hour? Long-No. Go and sit in the park for an hour; then you won't need it."-Chicago News.

Broken English.

Teacher-What are the parts of speech? Tommy Tucker-It's-it's when ■ map stutters.—Chicago Tribule.

T STREETCAR STRIKE

In San Francisco May Be Settled by Arbitration.

San Francisco, Sept. 1 .- There is a favorable outlook for the settlement within the next 24 hours of the strike on the street railways here. President Calhoun, after a long conference with Mayor Schmitz, authorized the mayor to offer arbitration of all disputed subjects to the car men. Mr. Calhoun insisted, however, that strikers must first return to work. Mayor Schmitz then summoned officials of the union. At the conclusion of this discussion the officials of the union issued a call for a mass meeting of the organization. Mayor Schmitz thinks that the end of the strike is near. The car men have already agreed to arbitrate the dispute over the work hours, and it is thought that they will make a similar concession on the wage

Strikebreakers En Route.

Ogden, Utah, Sept. 1.-Two trains carrying 850 strikebreakers, reached Ogden and departed later for San Francisco. The first train contained men from Philadelphia. While the first train was here the windows and doors were locked and the men were virtually held prisoners. At Green River, Wyo., they raided the depot hotel and since have been held in restraint. The men on the second train mingled freely with local unionists. They nearly all claimed to be in sympathy with unionism, and a committee sent a communication to the local papers saying that they were only taking advantage of a chance to reach California.

Stensland's "Securities."

Chicago, Sept. 1.-A private strong box belonging to Paul O. Stensland in the safe deposit vaults of the ruined Milwaukee Avenue State bank was pried open and in it were found 150 blank warranty deeds signed by the 'dummies" that were employed by the banker. These deeds are similar in character to numbers of others used by Stensland in his transactions with the bank. His method was to fill in the description of the property, record the deeds as transferred to the "dummy" signers and secure the funds of the bank, depositing the bogus deed with the bank as security for the loan.

Boycott Legal.

Washington, Sept. 1.—The rights of labor unions and their sympathizers to call on their friends to withhold patronage from a nonunion tradesman was recognized as not being illegal by Justice Stafford in the district supreme court here. In making this decision, Judge Stafford dismissed the temporary injunction against the Bakery and Confectionery Workers' International union which had been obtained by John Bender, a baker, who alleged that he was being harassed by means of a systematic tinued Mrs. Lombard, with haste, as poycott of him and that his customers had been asked to trade elsewhere.

Robbers Use Automobile. Kingston, N. Y., Sept. 1.-The automobile robbers who have committed depredations in Long Island, have appeared in this vicinity. Three men and a woman, all masked, entered the postoffice at Highland. They blew open the safe, secured \$500 in money and \$800 in stamps and escaped in an automobile, when residents, who had been aroused, came on the scene.

To Inform Americans. New York, Sept. 1. - The Cuban junta established offices here. Colonel Aguierre said that the junta's efforts will be directed solely to keeping the American people informed as to the course of the movement.

Storm Off Barbadoes.

Washington, Sept. 1.-The weather bureau announced that a disturbance of cyclonic proportions is prevailing east of Barbadoes. Reports locating the storm and its extent are expected today.

CUT TO THE QUICK.

The governor of Santiago, Cuba, has received reports of a rising at Songo, 20 miles from Santiago. At Canton, Miss., Lee Kingston, colored, was hanged for murder, having been convicted of killing his

wife. The Taylor Park Mining company, a Colorado corporation, capitalized for \$5,000,000, was placed in the hands of a receiver at Boston.

At Harrisburg, Pa., Samuel Boone, a negro, stabbed himself to death because his wife refused to furnish bail for his release for a trivial offense.

Edward Rosewater, editor of the Omaha Bee, was found dead in district court room No. 6 on the third floor of the Bee building. Heart failure is given as cause of death.

In a head-end collision between a Baltimore and Ohio passenger train and a freight in the Wheeling yards Lee McMann, engineer, of Beliatre, and William Moran, fireman, of Mc-Mahon, were killed.

Strike on Texas Southern. Shreveport, La., Sept. 1 .-- A special

from Marshall, Tex., says: All the

trainmen of the Texas Southern went on strike with the result that several trains were tied up. The men demand a reduction in hours from 12 to 10 and an increase in pay for overtime. The road is in the hands of a receiver, who will meet a committee pose of arbitrating the matter,

FINGER FELONS.

There Are Three Varieties of These

Very Painful Sores. A felon, or whitlow, is an inflammation of the hand or finger, usually of the last joint of the finger. Its importance varies with the seat of it-that is to say, with the portion of the finger involved. It may affect the skin only, the tendons or sinews or the fibrous covering of the bone-the periosteum.

A superficial whitlow, where the in-

flammation is confined to the skin, may

be extremely painful, but otherwise it

is not a very serious matter. But this

cannot be said of the other two forms.

In the tendinous whitlow pus forms

in the fibrous sheath surrounding the

tendon, and unless the inflammation quickly subsides or the matter is let out by the surgeon's knife the pus may burrow down through the sheath into the palm of the hand and result in a permanent crippling of the member. The third variety-called by physicians the subperiosteal-is that in which matter forms beneath the membrane which covers the bone. As this membrane is tough and inelastic the tension due to the increasing volume of matter becomes very great and gives rise to a throbbing, maddening pain. The relief afforded by a deep cut into this inflamed finger, right down to the bone, is magical, although the cut hurts. This is the only treatment for this form of felon, and the incision should be made early, for if it is too long delayed the bone will be killed and a discharging sore will remain which will later necessitate a surgical operation even if it does not result in

the loss of the last joint of the finger. The superficial whitlow does not usually call for such radical treatment. A clay poultice often affords great relief. This may be made by making a paste of clay previously sterilized by baking in a very hot oven and adding glycerin to prevent too rapid drying, or the clay may be obtained ready prepared in the drug store. This protects the finger from injury, keeps it cool and, if applied early enough, may prevent the formation of matter. When once pus has formed, however, no matter what the variety of the felon, the safest plan of treatment is to cut into the inflamed finger and give exit to the confined matter and relieve the tension of the parts.-Youth's Companion.

Her Claims to Patronage. When Mrs. Lombard offered to recommend Miss Simpson to her friends as a dressmaker she was honest in her wish to help the little woman, but her efforts bore more evidence of honesty than of tact.

"I wish you would try Dora Simpson," she said earnestly to three of her friends who were calling upon her one day. "She's such a good little body and so unfortunate! Her old customers have dropped off one by one til there's scarcely a person in the neighborhood who employs her now.

"As I often say to my husband," conshe saw signs of inquiry on the faces of her friends, "suppose she doesn't fit very well. That doesn't alter the fact that she has an invalid brother to support and that she tried everything else, from stenography to cooking, and only took up sewing as a last resort and just hates every stitch she takes and always has. Now, do try her, some of you. She's been with me for the last four days making a jacket for my Jim. Dora is just as patient about it as can be, though we've had it all to pieces three times."-Youth's Companion.

Why, Indeed?

At an examination of Sunday school children the following was one of the questions put upon the blackboard: 'Why did your godfathers and godmothers promise these things for you?" The answer of a bright girl, written neatly on the slate, was, "Why, indeed?" She got marks .--Christian Life.

You may depend upon it that he is a good man whose intimate friends are all good.—Lavater.

Want a Settlement. •

Norfolk, Va., Sept. 1.-It is understood that the family of the late General Fitzhugh Lee will request the Jamestown Exposition company to pay them \$10,000 for services rendered by the former president of the exposition company. General Lee had never had his salary fixed. President Tucker's salary was fixed at \$10,000 a year, and this may form the basis of the request.

junior vice commander of the Obio department, Grand Army of the Republie, made a scholarly talk. He devoted some time to the discussion of the proposal to erect a monument to the memory of Wirtz, the Confederate commander at Andersonville prison, whose cruel treatment of prisoners of war .made, his name hated all through the North. Colonel Pinn denounced him as a monster and demon and stated that should such a memorial be erected he would be willing to lead his comrades in an attempt to destroy it. His sentiments met the approval of the veterans and were heartily applauded."

A TINY BABY.

Weighed but Sixteen Ounces at Time of Birth.

of day in Massillon is, without a doubt, the sixteen-ounce daughter born to Mr. and Mrs. John Edward Fox, in North- Mill street, four weeks ago today. It was of such diminutive proportions that an ordinary finger ring could easily have been placed on either of its tiny wrists, and were it to have been put in a quart cup it would not have been cramped for room. The intant, is perfectly formed, and its head of long black hair makes it an especially attractive baby. For some time after its birth it ramained in a state of inertia and gave but little evidence of remaining in the world any length of time. Mrs. Mary Kutrieb, a woman of much epxerience in the care of infants, and who has graduated as a nurse from the Deaconess hospital and the Wesleyan medical college of Cieve-

land, was sought and removed it to her home in Euclid street, where she ministered to its needs with such success that the little one has adapted itself to the situation and at present weighs over four pounds. During the course of a conversation with an Independent reporter Saturday morning Mrs. Kutrieb talked interestingly on the manner in which many mothers Mrs. Basht Receives Letters fail to properly care for children, chiefly with reference to diet, which she said exerts a most important bearing on health. To maintain proper digestion, it makes far less differencewhat food is eaten than the manner of taking and the amount consumed In the choice of foods a good rule for Mis. Dora Young and children, of most people is to make a selection Edward Rosewater, editor of the by a purely natural appetite. The

The effects will be shipped to you in a few days."

FUEL OF THE FUTURE.

be Produced Unlimited.

The ideal fuel is liquid fuel of a nature to be readily vaporized. If the liquid be of a limpid, nonviscous character, the difficulties found in pipe line transportation with the thick fuel oils will not stand in the way of such 'transportation and distribution. We have in ethyl alcohol, says Cassier's magazine, an ideal fuel-colorless, limpid, of moderate bolling point, was made last night on a detachment about fifty degrees below that of water, non-freezing, burning without smoke, mixing with water in all proportions, and therefore its flame extingished by water, cleanly, drying off criminately into the crowd, killing completely when spilled, not attacking rubber gaskets or packings, and noncorrosive for metal tanks and holders The fact that the flame is bluish, or so-called non-imminous, means that the flame is always devoid of free carbon particles, with their intense heat radiating power, a fact of considerable importance. When gasoline or heavy oils are burning, the flame, loaded with Honolulu, Sept. 1.—(By Associated free carbon or soot, radiates heat to Press.)—The steamer Helene arrived such a degree that it is not possible to approach near the conflagration, and combustible surroundings are readily fired by pure radiation of heat. The production of aciohol on a large

scale is very simple, and the raw materials already exist in considerable variety. All saccharine or starchy growths are available. Saccharine wastes are now largely used in Cuba for alcorol production. | At present it Three Shocks Were Felt at Ems is said that the low grades of molasses cities at about three cents a gallon. Berlin. Sept. 1.—(By Associated About three gallons of this crade pre-

may be estimated at from three to four cents, making the cost of the aicohol a gallon about twelve cents. This alcohol will, in a properly organized engine, equal, volume for volume, gasoline now sold at a much higher price in producing power. Even in the immediate future, then, it is evident that aclohol has a large field of usefulness. The farmer need not depend on wood, coal or oil for his power. His agricultural wastes will furnish it. His fields need only receive the sunshine and be given sufficient water, and thence any crop yielding starch or sugar, however unmarketable otherwise, may be made the source of power, light and heat.

The use of alcohol as a fuel and as a source of power will grow gradually. Probably be Buried in the It would be idle to look for any sudden revolution in methods. When we extend our vision into the far future we Mott-Government Only De- can only speak of possibilities or probabilities. There is always a possibilfrays Expenses of Preparing ity of new discoveries modifying conditions to such an extent that our best present judgment may be in error; but, assuming that increasing scarcity and cost of mineral fuels will gradually simulate the selection and use of substitutes, it seems reasonable to predict that the one substitute which possesses the most desirable qualities is ethyl alcohol. The amount that can

STRAIGHT TIPS.

Care of Men's Clothes Saves Tailor's

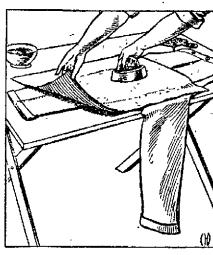

mm Services.... Caring for men's clothes is something almost every woman has to do some time in her life, for not always is the expense of a tailor's services possible, and to many it is a difficult task simply because they do not un-At Portland, Me., Franklin H. Reeven derstand just how to press trousers was ordained and married at the same | that bag at the knees or how to remove the sheen from coats that have perhaps The downger empress of Russia is outlived their usefulness or eradicate

"Pressing trousers is really exceedhusband's clothes always look as if tailor. "If they are pressed after every second or third wearing the knees will not only never bug, but the creases atthe front and back will always look fresh. The actual pressing is very easy. The seams at the sides of the trousers should be carefully matched before the trousers are laid on the froning board. This done, a damp cloth should be placed over the material and a hot iron used to press out the lines. The steaming caused by the wet cloth and the heat from the iron shrinks the stretched portions into Walter Graham Blackie of Blackie & thape, removing the bagginess. After Sons, the Scottish publishers, died the this is done hang them to dry thoroughly before being worn.

"Grease spots should, of course, be removed with gasoline, naphtha or some cleansing fluid and the material well brushed and aired before being pressed or the dirt will be ironed into the cloth and the entire labor lost.

Press Garments Often.

"Coats and vests need pressing about once a week if worn frequently, but I should never suggest doing this at The young sultan of Johore possesses home, for to properly iron shoulders, one great peculiarity. Many years age backs and fronts of these garments an accident with a horse resulted In boards regularly shaped, such as tailors nearly all his teeth being knocked out. have, are necessary, and without them These have been replaced by teeth of the work is bound to look botched. So solid gold, in each of which a large it is much better to send them to a tailor, for all torn places in either coats | can use the bean bags that have missed John Ward, the Labor member for or trousers can often be mended so

that they will not show, while if attempted at home by one who is not familiar with such work the suit will be practically ruined.

'When not in use coats and vests should always be placed on hangers to keep the shoulders in shape and the The doctors have now decided that neck of the former from sagging, as it there is no such thing as sunstroke. is bound to do if hung from a tape at But if you make a good hustle for it the top. FOR THE CHILDREN

Goosey Gander's name was just plain

Baby Goose until one day. This is

how it happened: There were five little goslings in the family. The liveliest one was named Baby Goose, and it was he who was the naughtiest. If one of his brothers found a fat worm Baby Goose would not let him eat it in peace. If he did not want it himself he would tell another brother to try to snatch it away.

One day Baby Goose saw one of his brothers find a big, fat worm right on top of the ground. At the same time ingly simple," declares a woman whose he saw what looked like a big bottle fly very near his own head. To keep they were cared for by an expert others from catching the fly Baby Goose cried:

"Hurry and catch that worm, sister, before Gandy swallows it." Then as his sister fought over the worm with Gandy, Baby Goose opened his big bill and swallowed the insect alive.

But oh, dear! It was not a bottle fly at all. It was a big bumble bee! Have you ever swallowed a bumble bee? If you have you probably remember it! "What a foolish goosey gander you are!" said his mother when he ran crying to her. "Creediness causes much trouble."

"Goosey Gander?' cried his brother and sisters teasingly. "We will call him Goosey Gander."

It was a long time before Goosey Gander forgot the sting of that bee .--Washington Star.

Bean Bag Basket Ball.

Suspend a basket by a rope from a doorway or some other place where it can swing freely. Place the first player at a certain distance from it and give him three or four bean bags or as many as you have. Then pull the basket to a certain height and let it swing back. The player tries to throw the bean bags into the basket while it is swinging. He is allowed a certain time, but within that time he again. Some one else can pick them up for him. The player who places most in the basket wins. It is well to remove your mother's best vase from the shelf near the doorway and to warn the members of the household against entering the room unexpect-

Another bean bag game is to place the players in three groups. The first group throws to the last group, and the group in between tries to catch the bean bags on the fly.

The Junco a Bird to Know. The junco is timid.

He's a northerner. He is a winter resident. He is ever genial and vivacious.

And he is simply never quarrelsome. He is likely to arrive in September and continually takes inventory of their from farther north.

He raises his family in the Catskills and New England,

It is proposed or quarters of sweet apples cooked tow the novel theater from town to tender. They are a great improvement town.

A HUGE CINDER TRAP.

Apparatus For Removing Fiying Cir-

ders From Smoke. An interesting device for removing cinders from smoke on a large scale is in use in Portland, Ore., where the operating plant of the street vailways employs sawmid refuse as fuel, says Engineering News. It has been found impossible to consume 550 tons of this stuff per day without producing an immense mass of flying cinders, which have proved a nuisance to the surrounding region. During the past year a einder separating installation has been put in by the raniway company, and in several months' working it has proved completely successful.

This installation consists of an induced draft plant discharging through a large steel separator of the same form as shavings separators used in sawmills. The separator is shown in the view herewith. The induced draft is obtained by a twenty foot steel plate fan connected to the boiler upcasts, which discharges into a steel plate flue leading into the separator. The latter is simply a vertical cylinder of steel plate, thirty-two feet in diameter, partly closed at the top, so as to leave a sixteen foot central opening, through which the smoke escapes. velvet in wearing qualities, proving the | Inside the cylinder is a spiral of the same diameter as the smoke outlet. The bottom of the separator forms a huge conical hopper for receiving the

CINDER SEPARATOR.

cinders. The height of the separator from bottom of hopper to discharge opening is fifty-six feet.

The smoke, entering the separator tangentially, describes a spiral path and loses velocity until it passes up through the open top of the separator The maximum velocity of flow of the gases in the flue leading from fan to ute. The velocity at the discharge opening, which is twice the size of the flue, is therefore about 1,300 feet per minute. The cinders are dropped a the range between these two velocities. As the gases lose velocity, the cinders, being heavy, drop in a spiral path to the hopper shaped bottom. Here they collect until removed by a steam driven conveyor, which takes them to the boiler furnaces for burning. The cinders collected vary in size from very fine particles up to pieces about one inch long.

A Wonderful Cement.

Professor Alexander Winchell is credited with the invention of a cehas made their feet suffer as they wore ment that will stick to anything. Take confide in her. Why? Because she their patent leathers will be the antimo ounces of clear gum arabic, one and one-half ounces of fine starch and "demipatent." It looks a great deal one-half ounce of white sugar. Pulverlike patent leather, but its manufactur- lize the gum arabic, dissolve it in as ers say that it has none of the unegree- much water as the laundress would able characteristics of the patent use for the quantity of starch and leather-that is to say, it does not sugar in the gum solution. Then cook "draw" the feet and it does not crack the mixture in a vessel suspended in boiling water until the starch becomes Automobile makers will be interested clear. The cement should be as thick in the claims of one of the exhibitors | as tar and kept so. It can be kept from spoiling by dropping in a lump of gum camphor or a little oil of cloves or sassafras. This cement is very strong indeed and will stick perfectly to glazed surfaces and is good to repair broken rocks, minerals or fossils. The addition of a small amount of sulphate of aluminium will increase the effectiveness of the paste, besides help-

Greatest Timber Area.

ing to prevent decomposition.

One billion dollars is the price tag on the standing timber in Washington, Idaho, Oregon, California and Montana. These timber lands are said to constitute the most important forest area in the world. In extent they are unapproachable, in the measure of production they are unequaled, and they surpass all other forests in the universal adaptability of their products. California has the fir, the western spruce and the red cedar. Eastern Washington has the yellow pine, which also is abundant in central and eastern Oregon and northern California, surpassing in size and equaling in quality the product of the pine belt of the great lakes. The amount of timber standing in the five states is placed at an aggregate of 700,000,000,000 feet.

A New Clothespin.

A wire clothespin recently invented is capable of being manufactured with great rapidity in a wire working machine and at a cost lower than that of the wooden pins. It consists of a single length of wire coiled into three loops. Two of the coils are employed in holding the clothes being dried while the third secures the pin on the line, so that it cannot be removed either acciseems to be developing among the dentally or intentionally. The pin can be moved to any point along the line where its presence may be desired.

Wind Resistance. It is calculated that a twelve horse

power touring car, built for moderate speed, requires more than five horsenower to overcome the resistance of the atmosphere-the wind of its own making-at thirty-two miles an hour, whereas the same automobile, if it sould be driven at the speed of 114 miles an hour, would require 234 horsedower merely to offset the air resistTHE TRIP ABROAD.

How to Prepare For Its Enjoyment

In a Sensible Manner. It is always well to get into first class physical condition before you underiske an ocean journey, for you are sure to tax your strength daily as far as it will go, says the Cincinnati Commercial Tribune. Your family physician can give you some safe, simple remedies fitted to your constitution, which you can take while abroad for and of the ordinary ailments to which your individual flesh is heir, thus sparing you many an uncomfortable moment as well as the necessity of calling in a strange practitioner. However good this doctor is, he may not immediately know how best to treat

The safest plan is not to take anything which your doctor does not heartily indorse, to avoid sweets, uncooked fruit and all things not likely to agree with you. When nauseated, assume a recumbent attitude and remain as quiet as possible. Take only hot and easily assimilated food and have a hot water bug, which you can place either at your feet or stomach. Heat will soothe a spasm of seasickness when all other methods fail. Spend as much time as possible on deck. All travelers will find it convenient

to have a piece of oiled silk, oilcloth or even waterproof cloth, if not a bag, wherein to wrap wet sponges and towels. Besides all the usual toilet articles, travelers are expected to provide their own soap. This is conveniently carried in the form of soap leaves. Be sure to have a celluloid case for your toothbrush bristles.

A flat steamer trunk to be left at the steamer office until your return is desirable. This will contain your steamer rug and a small pillow anyhow and probably most of your steamer outfit. A man should have on the steamer one medium weight traveling suit of good make able to withstand weather. Underwear of extra thickness will

make this suit warm enough for cold ocean days, while a couple of suits of gauze underwear will adapt it to temperate and even moderately hot days. An extra suit for emergencies, dress clothes, as need for them is likely to arise; a mackintosh or raincoat, which can answer for overcoat on cold days and even a dressing gown on a pinch, make the bulk of the impedimenta.

A feit hat of comfortable make and shape and a traveling cap answer every purpose as headgear for the average tourist. Most travelers, male and female, will find it wise to take the least possible amount of clothing with them. The only article of which both sexes should have a plenty at the start is footwear, which should be new, yet thoroughly broken in. Remember you are to walk many a mile and stand many an hour. Low heels, rubber preferred, are an assistance, and in most eases "high necked" shoes are better than the "decollete" variety. Keep

your ankles warm on shipboard. and Ladies should set out with one tailor made skirt and jacket, as plain as possible, of a material which will shed the rain and dust and stand the sun. These should be so constructed that you can get in and out of them without aid from anybody else. Beit, collar and tie should be securely fastened to shirtwaist and jacket, so that they cannot

be mislaid even in an emergency.

How to Care For Tired Feet. People who suffer from tired feet may note that a good deal of their discomfort is caused by the fact that they wear stockings that do not fit. Indeed, the fit of stockings is almost as important as that of shoes, says London Lancet. They should have as few seams as possible, as these cause corns. The feet should be bathed at night, and this treatment is an excellent sleep producer. The water should be salted. The feet should be scrubbed all over with a nailbrush, which will often prevent the formation of corns, while hard spots on the soles may be reduced with a piece of fine emery paper or pumice stone before

How to Keep Our Wild Fowl.

the feet are placed in water.

To keep our wild fowl from further decrease and better to increase their abundance it is vitally necessary so to regulate shooting that there shall always remain each spring a sufficient breeding stock to return to the wilderness "nurseries," certainly in no less numbers than the year before, says Country Life. Various restrictive measures which are now in force are none too many and are eminently wise and necessary, but there are the best of reasons for believing that the thing most emphatically needed at the present time is the absolute stopping of spring shooting in all parts of the country.

How to Prevent Tan.

If you are obliged to be out of doors very much you should secure a good cream and vegetable powder, says the Pittsburg Press. Each time before venturing out apply a little of the cream and then dust on the powder. In this way the face is well protected, and you will avoid another crop of the freckles and also be able to prevent the skin from becoming tanned. Each night wash the face with warm water and a good, mild soap, then rub on the whitening cream. In the morning wash with cold water. You will find that this treatment will bleach your skin as

How to Waterproof Cloth.

To waterproof cloth take of powdered alum and sugar of lead each half an ounce and stir them into a gallon of rain water, and when the mixture is clear pour off the upper liquid. Immerse the cloth for twenty-four hours, then dry and press it. The cloth will be uninjured in color and texture and will stand any amount of rain to which you are likely to be exposed.

MONDAY, SEPTEMBER 3 190*

A great change has taken place among persons of thrifty habits in this county within the last few years in respect to the placing of their savings. Time was when the good people of hereabouts who had money to spare found no other way of making it productive than in the acquisition of Stark county mortgages. These mortgages bore a fair rate of interest, but the bolder found the whole process la borious, and the renewal of the lean a tiresome business. Nowadays thousands, hundreds of thousands of persons, who once shunned Wall street as an iniquitous resort, have discovered that there are numerous standard sccurities to be had which can be disposed of at a moment's notice, and the tendency is more and more to buy them and put them away. For such as can afford to own intelligently bought stocks and bonds the ordinary ups and downs of the speculative market have no terrors. The change of en points sometimes announced rarely reflects a change in the earning power of the securities, and he who has pathe income fairly due but an hones price when it becomes necessary to sell. This country is never going to who cares to follow the published reties never were greater.

CONFESSIONS OF A DRONE.

The great grandfather of Joseph Medill Patterson was something of a contractor about Massillon, who did most of his own work. He knew nothing of Steel, American Tobacco ornewspaper profits. He abhorred drones. The callow youth's grandfather was a first rate school teacher, also about Massiiion, and he became eventually one of the strong men of the country, and the editor and founder of one of its leading newspapers, the Chicago Tribune. He abhorred drones, too, and it is conceivable that he would have had a special antipathy for the one who writes the "Confessions of a Drone" for the New York Independent. Mr. Patterson wants to spoil all the fur of living, or thinks that he does, by dividing everything equally and keep ing things thus divided. If he lived in a smaller community like this he would see that the people who do things are constantly moving up from the bottom, and that in the moving there are joys, ambitions and compansations which he would wholly eradicate. He complains that he knows very little about the enterprises from which his immense income is derived-speaking of his type, not his in dividual self. Well, why not bette seek to reform the type? Those who are down at the bottom in this country and trying to get up are not bitter or complaining because some people have more than others, and they look forward to climbing higher. All they ask is that the "drones" who by inberitance or otherwise have climbed up shall play the game fairly and giveto every man his chance. The toiling masses are getting along very confortably, barring the imported agitators with whom the grandson of Joseph Medillidelights to train. They can take care of themselves. The evils to he corrected are of another order, and will largely disappear if we can once obtain what the President calls "a square deal." Still, what the young man says about his type is interesting and explains, perhaps, why a youth who knows so little, and being probably endowed with an active mind in a sound body, should be so over-

whelmed with his own uselessness. "I have an income," writes Mr. Patterson, "of between ten and twen ty thousand dollars a year. I spend all of it. - I produce nothing- am doing no work. All (the type) can keep on do ing this all my life unless the present

eocial system is changed. "My income doesn't descend upon me like manna from heaven. It can "save: making up." tor of the Oxford dictionary. local use. From day to day information under this head will be given out, and then the lessons will be put to practical use. The general rules governing this matter are as follows:

e, choose e. Example: Anesthetic, esthetic,

2. If the choice lies between e and no e in words like abridgment, lodgment, acenowledgment, always omit the e

3. Use t in place of ed for the past, or past participle of verbs ending in s, sh or p. Examples. Dipt, dript, prest, distrest, husht, washt. An astonishing array of high literary authorities from Spenser to well is dited in support of this latter simplification.

4. Stick to ense in preference to ence when you have a choice. Example: Deoffense, pretense. 5. Don't double the t in coquet, epaulet,

stiquet, omelet. 6. When you can replace gh with f, do it. Example: Draft.

7. Better still, get rid of gh altogether For plough, write plow. For through, write thru. 8. Write the Greek suffix ise or ize with the z by preference. Example: Catechize,

9. Where any authority allows it omit the c on words spelled with ite. Exam-

ple: Preterit. Use a single i in words like distil, in 11. And omit one I from words now written like fullness Example: Duiness.

12. In words sometimes spelled with one and sometimes with a double m, choose the short form. Example: Gram, pro-

13. In words spelled with œ or e, choos e. Example: Esophagus.

14. Always omit the u from words some times spelled with our. Example: Labor,

rumor.
15. Where you can get any authority use in place of ph. Example: Sulfur, fan-16 In words spelled with a double, use a

single r, as bur, pur. 17. Spell theatre, centre, etc., in the English way-center, theater, niter, miter. 18. If a word is spelled with s or z in root, use the z, as apprize, surprize. 19. From words spelled with se or s omithe c. Example: Simitar, sithe.

20. Omit the silent terminal ne when atlowed. Example: Catalog, decalog, demagog, pedagog.

THE DEADLOCK.

Congressman of 18th District to be Chosen by People.

Four Hundred and Thirty-five **Ballots Taken Without Result** -Upham, of Stark County. Introduced Resolution Calling for Nomination by Popular Vote.

Salem, Aug. 30.—(Special).—After trying for six days to nominate a congressman, without success, the Eighteenth district Republican convention adjourned here at 8:30 o'clock Wednesday night and turned the nomination over to the people. The congressional committee was empowered to issue the call for the election. It will be held before October 7, 1906.

Wednesday night was Kennedy night with a vengeance. After the long struggle which had been waged, and after standing out against the combined onslaughts of Stark and Columbiana counties, which seemed to have victory in their grasp, Mahening county mounted serenely to the top and won the victory for which her delegates had been fighting since the opening of the convention, over a week ago. Stark and Columbiana counties held out to the last, but when Charles C. Upham, chairman of the former's delegation, presented resolutions turning the nomination over to the people, it tience to hold on will receive not only THE INDEPENDENT'S SPELLING was evident that all was over. Everyone realized the hopelessness of further balloting. The action taken was The Independent's spelling reform the only alternative. Scylla was on

> Immediately after the four hundred and thirty-fourth ballot was cast who are bound to have the hardest Wednesday afternoon, which stood Columbiana county, moved an adjournment until 7 clock in the evening, and quarters was higher than ever. the editor of the Standard dictionary, "We'll get out of here tonight," said Charles C. Upham, of Stark. Mr. Uptionary, Prof. Hempi, of Michigan, him went about the labby of the hotel and Prof. Louisbury, of Yale, two of making this answer to every delegate the foremost living authorities on the who asked when the convention would English language; the United States close. Many men about the hotel said commissioner of education, Dr. Harris; that nothing would be done during the President Butler, of Columbia univer- evening session, but Stark county leadsity, President Jordan, of Leland ers had the popular vote idea up their Stanford, and half a dozen college sleeves and it is now evident why

At 7:15 o'clock Chairman Jackson called the convention to order. "Is Now if the board of education of the Columbiana county ready to vote?" city of Mass'llon can be induced to he asked. "It is," came the reply. a box. Through the long list of dele- etc., was rendered. gates the secretaries went, calling out

was completed and the result appoundcounty delegates.

As soon as the excitement had died pitality during the two sessions of the citement at Youngstown.

together. At the close of Turner's remarks, Chairman Upham moved a recess of ten minutes. It was evident that something strange was to happep. Grant had lost two votes. The secret ballot plan had not been so successful as the Stark county leaders hoped it would be. What the next move would be was anticipated in anxious suspense. At 8:15 Chairman Jackson declared the convention in order. Ail eyes were turned on the little knot of Republican leaders down in the front row. Mr. Upham rose and in his deliberate manner offered resolutions anthorizing the congressional committee to issue a call for a primary election for the purpose of nomi nating a candidate for congress from the Eighteenth district. For a second all were dumb with surprise. Then with a mighty roar the convention president or secretary. burst into cheers and yells. The galleries, as well as the lower floors, were

The motion to adopt the resolutions

was soon put. The vote by counties was taken. Judge DeFord asked time in which to canvass the vote of Columbiana county and stated that there was a considerable difference in opinion among the delegates from his county. His troubles were increased when it was found that the secretary had disappeared with the county roll, so after all the vote could not be cauvassed. The votes of the o her two counties were taken, for the second time since the opening of the sessions Stark and Mahoning voting together. A moment later, seeing dissension

the resolutions were passed unanimously. Thomas Turner again took the platform and moved that a vote of thanks be extended to Chairman Jackson for his fair and excellent management of the meetings of the convention. The motion was unanimously carried and it was a long time before order was restored, so badly did the delegates want Mr. Jackson to know that they appreciated his work

Just before he dropped his gavel for the last time and declared the convention adjourned, Chairman Jackson said: "This, gentlemen, enda our sessions here. The matter of the nomination of a congressman goes back to the people. Let the candidate that is nominated be a menace to l'emocracy and let him go forth with the standard of the party triumphantly to victory. Let us stand together for our party and its candidate. I now declare this convention adjourned sine die." The

gavel fell. It was all over. To say that the Mahening county delegation and sympathizers went wild would not do their conduct justice. While they were making their noise, however, the Stark and Columhiana county delegations were trying to catch late trains and were to be seen scurrying along with suit cases and other baggage.

The victory of the Kennedy men was the talk about the hotels here after the adjournment. Everyone was happy. It now comes down to a thorough canvass of the people upon the part of the candidates. While it cannot be denied by anyone that Kennedy stands a better chance in a popular Speaker, yet it is believed that Grant's chances are excellent.

The unit rule is forever dead. There is probably not a man who would dare to present it in any fcture convention of this district. In fact, it seems to be the concensus of opinion that even congressional conventions are a thing of the past. At all events this one is a sore disappoint ment to all. It is probable that the primary election will take place about the middle of September.

THE SEVENTH REUNION.

Donat-Crossland-Walter Fami lies Hold Annual Meeting.

The seventh annual reunion of the Donat, Crossland and Snavely families was held at the home of Mr. and Mrs. W. B. Walter, four and one-half miles southwest of the city, Saturday, August 25. After all had partaken of a week's vacation. Dr. J. D. The same employes affiliating with labor organcourse would have followed had the complaint been one about the failure of Great Britain to protect American the department would afford the fullproperty.

The significance of the report lies, first, in the raid by the insurgent the union. band. There are other plantations near Cienfuegos which were not molested. In the second place it is significant in that the report was made to the state department instead of to the local Cuban authorities. It is to be inferred that the insurgents chose to make the attack upon American property for a purpose other than that of mere stealing. If they were averse toward American intervention their natural course would be to avoid plantations owned by Americans so as to give no excuse for interference.

FORCING EATING.

Do Not Make a Child Take Food It

Does Not Want. "Never force a child to eat food it does not want," says a well known children's specialist in the New York Telegram, "and let it choose the things it likes if they are not known to be injurious, for when a small boy or girl is in a normally healthy condition the appetite should not be abnormal and the dishes it craves the system ordinarlly needs, I believe, and for that reason I think a mother should ask a child between the ages of five and seven what food it wants at meals and endeavor to supply the dishes asked for.

"I always lay special stress on the statement-never force a child to eat food it does not want-for I know from my experience that nothing will bring on indigestion quicker than .to make a youngster eat a dish it does not care for. Rebelling against the food makes the boy or girl nervous, and nothing so readily disarranges the stomach as excitement. For the child's own good I think it should never be compelled to take undesirable foodstuffs. Yet I know many parents with healthy children who decide what is good for them and then place the dishes before the little ones, and if they do not eat of them they get nothing, but this course of treatment with a nervously constituted child is injurious and more than apt to bring on chronic indigestion.

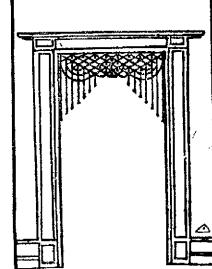

"Of course parents must select the dishes to a certain extent. They should make sure that there is plenty of variety in vegetables and fruits, especially during the summer months, when fresh ones are so plentiful.

"But, aside from there being a sufficient number of dishes to keep the appetite good. I should permit a child to regulate its own diet."

DOOR DRAPERY.

Attractive Curtains Made of Strands of Wooden Balls.

A new kind of door drapery that bids fair to displace some now used is the invention of a Cleveland man. It consists of a series of strands of solid wooden balls, arranged to form an attractive and novel appearance. The

STRANDS OF WOODEN BALLS.

balls are all of a uniform size and can be colored to suit individual tastes. Designs of more than usual-beauty can be made by careful arrangement of the balls. Besides being less destructive than bamboo or cloth curtains, they would also be more readily cleaned .-Chicago News.

Keeping Food. In an icebox which I looked into recently two slices of sirloin steak were laid flat on the ice. In lifting them from the ice to a plate they were turned over, and the side which had been next to the ice was bleached white. The woman who had laid the meat directly on the ice knew better probably than to put it into a pan of water to soak, but she had accomplished nearly the same thing, for the melting ice had almost entirely washed away the juices of the meat. Leaving meat in wrapping paper is another way to waste its juices.

Because water is the native element of a live fish is no sign that a dressed fish should soak in water. It should be wiped with a wet cloth and laid on a plate in the icebox. It is well to keep in mind that frozen or cold storage foods spoil more quickly than fresh food when brought into the house. This causes some surprise, as when a chicken or fish apparently in perfect condition spoils in a few hours, even in the family icebox. Meat that is on the doubtful line is often made palatable by a bath in soda and water. -Chicago Inter Ocean.

Stewing Meat. Stewing has been described as the most economical method of cooking ever invented. No great heat is required, and practically no attention is needed, and by this process we are enabled to make use of pieces of meat which, while very nutritious when carefully dressed, would otherwise be too tough for food. The meat is put in the stew pan with a very little cold water - not enough to cover it - and then gradually heated. Remember, stews must never boil. When the meat is half done vegetables may be

Airing Lineas,

Linens should be given a thorough airing every now and then; most thoroughly of all, of course, just after they have come from the laundress. Plenty of light and air, as well as sonp and water, are necessary to keep them in spotless condition, for what occult reason only some one wise in the laws of physics can tell. But the results will tell their own tale-tirings are the best preventives of "freckles" and mold and mildew.

NATIONAL APPLE DAY.

Date Set For Annually Paying Trib-

ute to This Fruit. : Everybody get ready for Apple day. The third Tuesday of every October has been set apart by the American apple growers' congress as a day for the payment of special tribute to this GOOD AS A REGULAR ROUNDSMAN glorious fruit. The observance is to begin the 16th of next October.

While there were no specific suggestion as to how Apple day should be celebrated, the members of the congress unanimously agreed on October as the month in which to hold the cele bration, because about that time of the year most of the fairs take place in the southwestern states, says the St. Louis Post-Dispatch. It is hoped the fair dates can be arranged to coincide with the apple festival.

The members of the apple cougress think the popularity of the apple will spread much more rapidly if Apple day is made a feature of the fairs wherever possible. In such a case anples from all over the country could be exhibited and prizes could be given for apple pies, apple sauces and for the best apples from each community.

This, the apple growers think, would encourage the cultivation of the fruit, which, they say, is not half as well appreciated as it deserves to be.

In places where fairs are held either earlier or later than Apple day special apple exhibits should be held. The members of the congress hope

that the third Tuesday in October will In time become a fixed holiday on the calendar of the United States just as Labor day and Thanksgiving day.

MEN'S AUTUMN STYLES.

Coots a Trifle Shorter and Without

Vents-Trousers Narrower. Concerning clothes for autumn the one could hardly go amiss, so there is no particular prophetic merit in having hit the mark to a nicety. The ultra model of lounge suit is primarily for autumn, yet I anticipate no radical departures from its pattern in the suit for winter, says a writer in the Haberdasher. The jacket is a trifle shorter than that for spring and summer, is cut with very little shaping at the waist. fits snugly about the hips and is fashioned without vent. The lapel has the long roll and is closely notched and the edge is cut rather sharply away from the lower button with curved instead of the prevailing angular effect. Shoulders are squared and sleeves narrower than heretofore. Pocket flaps follow the curves of the jacket edge. Wide stitching on collar lapel and edges is a distinctive characteristic. The breast pocket may be incorporated or not, according to individual preference.

Owing to the vogue of the high cut waistcoat six and seven buttons are used. Trousers are not so wide and will be cut to extend scarcely below the ankle. We may expect extremes in this regard and likewise a lot of published statements of the return to "high waters," which will be awry only if the tide rises too far. Then, also, a fad will be the turnups at the bottom, which, however, will not prevail beyoud the calendar limits of autumn if. indeed, biting weather does not compel its abandonment ere that date.

NOVEL CLEVELAND SCHOOL

Girls to Be Trained For Service In Homes of Rich.

Mrs. Tom L. Johnson, wife of the mayor, has joined with many other wealthy and prominent Cleveland women to further the interests of a "training school in household science," which will be opened in the Burt mansion, Prospect avenue and East Thirty-second street. Cleveland.

The school will be one of the most novel in the country, says the New York American, in that board will be given free to all girls who are auxious to train for service in the homes of the rich and are properly recommended. Miss Frances Broderick and Mrs. N. F. Schreck are to be in charge of the institution. Miss Broderick said re-

cently: We will teach everything necessary for a girl to know when she enters domestic service. We will even teach the deportment consistent with homes of

luxury." With the backing of wealthy women it is believed the school is slated for great success.

President to See Target Practice. President Roosevelt has made plans to be present at the next target practice of the fleet, which will be held off Massachusetts bay on Sept. 23, and to be on board one of the war ships taking part in it. This will be the first time that a president of the United States has been on board a vessel at target practice since 1843, when President Tyler and

and injured thirteen other persons. Vacation's End." When the branch is all bare. When the bissom is fair And the meadow grows sullen and brown, When the cars seem each day

To run only one way, And that is the way to the town, Then you yearn for the life That means bustle and strife, And sylvan delights become tame, And a voice far away Seems to whisper and say That it's time to get into the game.

When the breeze now and then Hints of autumn again, And the blood feels a quickening thrill: When a leaf here and there Flutters forth in the air the sycamore up on the hill; When the shrill katydid.

In the foliage hid. Has begun its incessant acclaim. And uncommonly sweet That it's time to get into the game. -Washington Star.

Device to Keep Tabs on Somerville (N. J.) Bluecoats.

Automatic Timepieces Will Record Policemen's Going and Coming. Must Be Wound Every Half Hour With Keys Distributed Along Officers' Beats-How the Bluecoats Re-

The guardians of the law of Somerville, N. J., are bewailing the proposed man, says the New York Telegram. favorably upon the plan, and it is to be experimented with as soon as some of years, cooking. the "clocks" which have been ordered arrive.

Edward F. Brown, who is a New York broker by day and Somerville worked out as follows:

Every man on patrol duty will carry with him an automatic timepiece about two-thirds the size of a Waterbury alarm clock. Each clock is to have six keys and the keys are to be kept in separate boxes which will be stationed at six different points on his beat, Every half hour he must go to a different box, take the key from it, wind his clock with it and thereby register his whereabouts at that time. Printed placards are to be distributed all over tendency has been so well defined that town informing the citizens where each policeman is supposed to be at certain times. By this plan the police commissioner hopes to be able not only to keep tabs upon his men, but also to let the citizens know just where to Women Who Would Be Atlantic City summon police aid if it is desired.

The rank and file of bluecoats here,

"Gee," said the day force, whose the morning till 7 at night, "it looks as if they were trying to Binghamize us. Next thing you know we'll get the two platoon order and then one post." And he groaned at the mental picture of such a calamity.

"Of course, you know," he continued, "there's a portion of the force that ain't been living up exactly to the rules and regulations of this department. That portion has been seen at times patrolling his beat as if it were shaped like the letter Z. but I'm hanged if I can see why we should all be compelled to find the keyhole of a clock just because one may miss it. Take it for mine, the wife will have to build an extension on my vest pocket if I've got to carry a Waterbury clock to work patent leather boots."

scheme was couveyed to them

"It's tough," said one. "You bet," said the other.

Just then the other third of the midnight squad arrived on the scene. "What's the row?" he inquired.

When informed of the new plan he was silent for a moment. Then he and the peace of the beach. turned to the others and said. "Well, we'll have to learn solitaire, and that's all there is to it." "But penuchle's a fine game." mut-

tered one of the others absentminded-

"Yes, but you can't play it all by

yourself," was the curt reply. Although the force is opposed to the clock scheme, the townsfolk think it's the one best bet—that is, the majority of them do. Some of them, bowever, are so pessimistic that they believe the police will soon find a way to "beat" their beat.

When the plan was outlined to the town poet, who is the most pessimistic of the lot, he chanted gloomily:

"Dickery, dickery, dock, The cop wound up his clock; The clock struck one, Ilis work was done. Dickery, dickery, dock."

"That's what it'll be like," he said, "and that's no Mother Goose yarn. If a cop wants to kill time he'll kill it,

And judging from the attitude of "the cops" if the clock device is installed they will certainly try "to kill time."

Amiethysts In Favor,

The gem of the season is undoubtedly the amethyst, and almost every lady of fashion is now wearing the several members of his cabinet went on | pretty purple stone, says a London caboard the Princeton to see "the Peace. ble to the Philadelphia North Amerimaker! fired. On that occasion the can. Queen Alexandra first set the famous gun, a monster in its day, burst | fashion. Her example was easy to folat the first shot and killed the secretary low, as amethysts are by no means exof the navy and the secretary of state pensive. Stones of the size of an almand nut, of the best quality, can be purchased for \$15, but those of a lighter color can be obtained for \$2.50 or \$3. Set in the form of a pendant or brooch is the most becoming manner to wear the gem.

Novelties For Flower Display. Baskets of English radium glass are among the novelties which have come into vogue for summer entertaining. This lovely ware, showing all the colors of the rainbow with the softness of an onal and the dainties of a wide mouthed basket filled with nasturtiums or varicolored roses and dahlias, is indescribable. Mrs. Roosevelt received such a basket from Mrs. Whitelaw Reid when the ware first attained popularity in England, and it has formed the centerpiece in all her Oyster Bay dinner parties,

TRAIN GIRLS FOR WIVES.

Technical Institution to Turn Out Experts Planued in Cleveland.

Superintendent Elson, and Assistant Superintendent Hicks have planned a technical high school in Cleveland to and observe thence the new force that prepare girls to become wives, says a Cleveland dispatch to the New York upon the rest of the world, Times. They will be taught to sweep, cook, economize in household expenditures, make their own clothes, take care of babies and nurse their husbands when they come home sick from

the office. "We are going to fit our girls to become wives and not servants, and cooking is only one of the features of the course," said Mr. Hicks recently. "A installation of a clocklike device which partial outline of the course would be will keep tabs on them while on post this: First year, applied arts and elewith the efficiency of a regular rounds- mentary sewing; second year, elementary chemistry in its relation to The tewn board has already passed household duties and a continuation of arts and sewing; third and fourth

the average man expects her to perof cooking, usually. She must be police commissioner at night, is re- taught how to care for the invalid, the sponsible for the new idea. It is to be foods be requires and the attention his

room must receive. "She must learn of the care of little bables. Thousands of the little ones are a daily sacrifice this hot weather to motherly ignorance.

"She should know how economically to do her marketing, economically in the broader use of the word. She should learn the value of proportion in the preparation of the daily meals, how some foods go better with others and what foods are best at certain periods of the year. She should know also when and how to put up fruits in the form of preserves and jellies.

"All these things we shall teach them.'

DRESS FOR FAIR COPS.

Policemen Give Suggestions.

Mayor Stoy's threat to use women as however, do not take kindly to the police because of the scarcity of ableplan. They see terrifying possibilities | bodied men willing to wear brass butin it and look upon its installation with | tons on the beach has aroused the question of the proper costume in which the fair cops are to be caparisoned. beat covers the whole town from 9 in Several women who want jobs on the force have taken the matter into their own hands, says an Atlantic City dispatch to the New York World. One of them sent a letter to the mayor with a of the finest and most beautifully sketch of her curves and angles and a

treatise on dress. "I hope I will not be thought presumptuous," she wrote, "when I say that the uniform which I may be com- cut off in a curved line. TEDDY JUNIOR AN ARTIST. of President Makes Profile

Sketch on Menu Card. That Theodore Roosevelt, Jr., is able World. That he is able to draw a room that the young woman escaped. sketch-and quickly-is proved by the menu card in possession of the head waiter of the American House, where the president's son used his pencil as

he waited for his meal. Theodore junior never has made special study of drawing, but he shows a natural aptitude for the work and an especially keen appreciation of facial outlines. When he entered the dining room with the two frlends who will accompany him on his hunting trip he leaned back in his chair, looked around the room and then taking a pencil from his pocket made an excellent sketch in profile of a guest seated at another table.

He used the back of a bill of fare, a rather wabbly piece of bristol board, and after he had drawn the face of the guest he made a rapid sketch of a dog lying at full length with its nose between its forepaws. The artist signed his name in two or three places, and the card was seized the moment young Roosevelt left the table. The president's son gave the head

waiter a tip of 50 cents. Shirt Waist Dress For Soldiers. The soldier in shirt waist, with his

shoulder straps or chevrons fastened to the shirt sleeves, is to be rendered twenty-five years after I am dead. It regular and correct in the Philippines | might be safe and proper to do it then, and elsewhere that climatic conditions but not now-by all means, not now." make the coat uncomfortable. General Wood, in command in the Philippines, some time ago suggested this rule. The department after consideration has authorized the use of the khaki chevrons on shirts, and when it has money available for such use will make provisions for a like application of shoulder straps. General Wood is author. She soaks the crumbs in liquids of vaized to make regulations under which soldiers may dispense with their coats, it being insisted, however, that uni- a process for making the crumbs clasformity shall be maintained.

HOW JAPAN IS GOVERNED.

An Impressive View of hier Quiet, Self Contained Statesmen.

Sit in the gallery of the lower house of the Japanese national parliament civilization and education have loosed

The clumber is about as large as the louse of representatives at Washingion, comfectable, convenient and plat- i ned for business. The members sit at desks factor the speaker's high dais midway of the long side of the room. Ten or twelve members wear the almost obsolete native costume; the others are garbed like Europeaus. You will notice first of all that these men do not sleep, like members of the British house, or read or write or transact at the desks their private business, like the representatives at Washington. They listen to every word of every speech. They are liberal of applause and dissent. Everything that is said seems to mean something to them. There are no long, dreary harangues "The average girl who marries now- and no permission to print in the Recadays is pitiably ignorant of the duties ord. Members that address the house mount a rostrum just below and in form as his wife. She knows nothing front of the presiding officer. Their speeches are short, sharp, direct and full of point. Of en they are witty and very often eloquent, but never are they entered for endurance prize. You observe the faces intent upon

the speakers, the lines of long, strong, square jawed, brown faces, and it startles you to reflect that the powerful, indomitable nation of which this grave deliberative assembly is the symbol has been created in fifty years from the least promising of materials; that in difteen years it has been lifted to the front ranks among peoples; that all the world has been amuzed by its performances. And then you will suddealy perceive that in your eyes every face before you is an impenetrable mask. From each you receive a definite impression of power-quiet, self sufficing, conscious power-but beyond this nothing. All you can see are eyes, nose, mouth and the blank stone wall of an expression from which no amount of scrutiny will enable you to draw a hint of the trouble within .- Everybody's Magazine.

Extension Table of Rare Sort. Something original in the way of a dining room table has been made by a skillful cabinetmaker for Mrs. Harry Payne Whitney's home in Newbort. In its first form it is a perfectly plain round table, six feet in diameter, made grained mahogany, with simply carved legs. Belonging to it are a series of pieces of the mahogany, the shape of eight sections of pie, with the point to do with my acceptance should I be may be added to the table, making it reaching below the waist. With this I knowing it was not made in one plece. should suggest brass buttons and gold Still another series of pieces to be addbraid as trimming. The skirt should ed in the same way make the table are arranged so that their tops unfold Another applicant wants to wear and extend to support the added pieces.

AN EXCITING TRIP.

The Varied Perils of Navigation on the Yukon River.

Getting on a sand bar is a part of the Yukon programme, and we reached this act early in the afternoon of the first day. The river is constantly changing, and a new channel is made each year. All steamers carry huge poles, known as shears, or sometimes called "ships' legs." When a sand bar is struck the pole is dropped off the side and stands upright in the sand. A pulley is attached at the top, the engine is started and the boat lifted and swung forward six or eight feet. This process is repeated until the vessel is clear of the bar. During the jumping off process the passengers are sent aft in order to lift the bow. When somebody stupidly asked the captain how long we were going to stay at this point he answered, "Anywhere from an hour to a week." We were lucky in being fast for only two hours. The Selkirk, which followed a day later, spent the entire night on the same obstruction. Soundings were taken with a gandily painted pole, which suggested a Fourth of July pole vaulting exhibition. The man who did the measuring had a singsong way of speaking, and he constantly drawled, "Two feet -two and a balf-three teet-no bottom-four feet," until we were in deep Late in the afternoon we reached Lake La Barge. Here the ic was from

ten to eighteen inches thick and spread from shore to shore like a great field of snow. We pushed on, while the sharp ice pourded savagely against the hull, which was built of inch and a half planks. It semped and cut the sides of the boat and buckled and formed little ice mountains over the lake. We ran slower and slower until, after cutting through five miles, the captain deelded that we could go no farther in safety, so the Casca fied up at an uninhabited island to walt until the sun and wind should cause the ice to break. The mosquitoes welcomed us and came aboard by the thousand. Some of the passengers rushed ashore and built a huge fire out of old logs in order to protect themselves from the pests; others climbed to the top of a hill and sat in a row like so many owls. All day Sunday we waited. The crew carried logs aboard and built an ice plow for the boat. After twenty-four bours' delay we east off and went into the ice. The river is fortuous and muddy, and in many places the current runs nine miles an hour. Narrow gorges are entered, and at Five Finger rapids we were treated to the sensation of running the rapids between rocks scarcely twice the width of our boat apart. This place is considered extremely dangerous, and boats coming up the river, in order to avoid being dashed against the rocks, pick up a cable fastened on shore for that purpose and by winding it around the capstan pull themselves up the rapids.—Mrs. C. R. Miller in Leslie's Weekly.

Crushing a Clerk.

He was rather carclessly dressed, yet any one who is at all an observer could have seen at a glance that his clothes were of excellent material and had evidently been made by a good tailor. But the clerk in the hat shop was young, and he stood by watching the customer pull over an assortment of colored hathands until he struck one that caught his fancy. "I'll take this one." he said, handing it to the clerk.

"That's the New York Yacht club colors," remarked the clerk, as if that settled the question. The customer looked at him sharply and repeated his statement that he would take the blue and red and white band he held in his hand.

"But you don't want that," protested the clerk. "That's only worn by members of the New York Yacht club." "I'm one. Just put it on my hat, sonny," said the man dryly. The clerk wilted at once.-New York Press.

The Power of Gasoline.

In the tests recently made over country roads between New York and New Haven to determine how far two galions of gasoline are capable of driving an automobile sixty-five machines of many sizes and types were used. The best performance was by a four cylinder machine of twelve horsepower. which ran eighty-seven miles. Another machine of the same make and ly blued, and the clothes are ready for . same pattern ran only fifty-eight miles. the line. The Iron Age points out that a weight of 1,500 pounds was moved eightyseven miles on two pounds of gasoline, which means a ton mile for half a

Just a word more in regard to the

trusts. Some defend them on the ground

that they are an economic development,

and that they can not be prevented with-

our great injury to our industrial system.

This may be answered in two ways

First, trusts are a political development

rather than an economic one; and sec-

ond, the trust system can not be permit-

tal to continue even though it did result

in a net economic gain. It is political

because it rests upon the corporation, and

the corporation rests upon a statutory

foundation. The trust, instead of being

a natural development, is a form of legal-

ized larceny and can exist so long as the

law permits it to exist. There is a point

beyond which the economic advantage of

large production ceases. The moment an

industry approaches the position of a mo-

nopoly it begins to lose in economic effi-

Hency, for a monopoly discourages in-

vention, invites deterioration in quality,

and destroys a most potent factor in pro-

duction, viz: Individual ambition. Socialism presents a consistent theory,

but a theory which in my judgment does

not take numan nature into account. Its

strength is in its attack upon evils, the

existence of which is corfessed. Its weak-

ness is that it would substitute a new

disease—if not a worse one—for the disease from which we suffer. The Social-

ist is honest in the belief that he has a

remedy for human ills, and he must be

answered with argument, not with abuse.

The best way to oppose Socialism is to

remedy the abuses which have grown up

under individualism, but which are not a

necessary part of individualism, and the

somer the remedy is applied the better.

reasons for opposing the Socialist doc-

Nationalization of Railroads.

New York, Aug. 31.—Hon. William L. Bryan, responding to the welcom of the truth when I say that the senate ing addresses delivered at Madison has been for some years the bulwark of Square Garden Thursday evening, predatory wealth, and that it even now said:

ELike all travelers who have visited other lands, I return with delight to the as to prevent needed legislation. land of my birth, more proud of its pouple, with more confidence in its government and grateful of the kind providence that, east my lot in the United States. My-national pride has been increased because of abundant evidence I have seen dently blocks the way. of the altruistic interest taken by Americans. In the people of other countries, No other nation can show such a record of benevolence and disinterested friendship. My love for our form of government has been quickened as I have vis-ited castles and towers and peered into dark dungeons, and I am glad that our nation, proviting by the experience of the past and yet unhampered by traditions and unfettered by caste, has been permitted to form a new center of civiliza-(tion, on new soil and erect here "a government of the people, by the people, and for the people.'

The first message that I bring from the old world is a message of peace. The cause of arbitration is making real progress. There is a perceptible growth in sentiment in favor of the settement of international disputes by peaceful means. It was my good fortone to be present at the last session of the interparliamentary aunion which convened in London on the 23rd day of July. Tweaty-six nations were represented, and these included all the leading nations of the world. This peace congress, as it is generally known, not only adopted resolutions in favor of the limitations of armaments and arbitration of all questions relating to debts, but unanimously endorsed the proposition that: all questions of every nature should be submitted to an impartial tribunal for investigation or to the mediation of friendly nations before hostilities are commenced. The embodiment of the suggestion in treaties would go a long way toward removing the probability of war. I believe that if our nation would prepare to make with every other nation a treaty providing that all questions in dispute should be submitted to The Hague court, or some other impartial international tribunal for investigation and report before any declaration of war or commencement of hostilities, it would flud many nations willing to enter into such ascompact. To take the lead in such a movement would establish our position as a world power in the best sense of the

**** Navy and Collection of Debts. Another subject connected with our foreign relations: I venture to suggest that we may not only promote peace, but

also advance our commercial interests by announcing as a national policy that our navy will not be used for collection of private debts. While protecting the lives of our citizens everywhere and guaranteeing the personal safety of all who owe allegiance to our flag, we should, in my judgment, announce that persons engaging in business and holding property in other lands for business purposes must be subject to the laws of the countries in which they engage in business. Many profitable fields of investment are now closed because the peoancinvestment of foreign capital will be made an excuse for a foreign invasion. Several times on this trip this fact has been brought to my attention, and I am convinced that for every dollar we could secure to American investors by an attempt to put the government back of their private claims, we would lose many dollars by closing the door to invest-

Before leaving international politics, let me add that our nation has lost pre to tige rather than gained it by our experiment in colonialism. We have given the monarchist a chance to ridicule our declatation of independence and the scaffer has twitted us with the inconsistency. A toursthrough the Philippines has deepened the conviction that we should lose notitime in announcing our purpose to deal with the Filipinos as we dealt with the Cubans. Every consideration, commercial and political, leads to this conclusion: Such ground as we may need for coaling stations, or for a naval base, willche readily conceded by the Filinings who simply desire an opportunity to work out their own destiny, inspired by our example and aided by our advice. Insofar as our efforts have been directed toward the education of the Filipinos we have rendered them a distinct service, but in education we must recognize that we are making coloniatism impossible. If we intended to hold them as subjects we would not, dare to educate them.

Would Have Quick Action. In the several of the nations of Europe the legislative department of government is more quickly responsive to public senti ment than is our congress. In England. for instance, where the ministry is formed; from the dominant party, when an election is held upon any important issue the government proceeds to put into law the will of the people expressed at the polls; While our system is superior in many respects it has one defect, viz. that congress does not meet in regular session untiled? months after the election. During this period there is uncertainty, long drawn out, which to the business community is often more damaging than a change of policy promptly carried into effect. Would not the situation be improved by a constitutional amendment convening the first session of congress within a few months after the election, and compelling the second session to ad-

journ several days before the following the property of a change in the method of electing United States senators. There-is-noticeable everywhere a distinct mevement toward democracy in its

Newspaper###CHIVE®

trend toward democracy has taken the form of a growing demand for the elec-tion of United States smaters by a direct vote of the people. No important legislation of a national character is possible until the senate is brought into harmony with the people. I am within the limits contains so many members who owe their election to favor seeking corporations. and are so subservient to their masters popular branch of congress has four times declated in favor of this reform by a two-thirds vote, and more than two

thirds of the states have demanded it, and yet the senate arrogantly and unpu-Favors Income Tax. The income tax, which some in our country have denounced as a socialistic attack upon wealth, has, I am pleased to report, the endorsement of the most conservative countries in the old world. It s a permanent part of the fiscal system of the income tax that I feel sure that

of most of the countries of Europe, and in many places it is a graded tax, the rate being higher upon the largest incomes. I am so convinced of the justice the people will somer or later demand an amendment to the constitution which will specifically authorize an income tax, and thus make it possible for the burdens of he federal government to be apportioned among the people in proportion to their ibility to bear them. Society is justified in demanding that

the differences between capital and labor shall be settled by peaceful means. If permanent impurtial board is created o which either party of an industrial dispute may appeal, or which can of its motion institute an inquiry, public opinion may be relied upon to enforce the finding. If there is compulsory submission to investigation it is not necessary that there shall, be compulsory acceptance of the decision, for a full and fair investigation will in almost every case bring about a settlement. No reference to the labor question is complete that does not include some mention of what is known as gov-ernment by Injunction. As the main purpose of the writ is to evade trial by jury t is really an attack upon the jury system and ought to arouse an unanimous protest. As the writ is usually invoked in case of a strike, the importance of the subject would be very much reduced by the adoption of a system of arbitration. because arbitration would very much reduce the probability of a strike. Money Question.

Our opponents have derived not only partisan pleasure, but also partisan advantage from the division caused in our party by the money question. They ought not to, therefore, begrudge us the satisfaction that we find in the fact that inexpected questions have removed the cause of our differences and permitted as to present a united front on present is --The unlooked for and unprece dented increase in the production of gold had brought a victory to both the advocates of gold and the advocates of bimetallism - the former keeping the gold standard which they wanted, and the latter securing the larger volume of money for which they contended. We who favor bimetallism are satisfied without victory. if friends of monometallism are satisfied with theirs. And we can invite them to a contest of zeal and endurance in the effort to restore to the people the rights which have been gradually taken from them by the trusts.

The investigations which have been in progress during the past year have disclosed the methods of those who a few years ago resented any inspection of their schemes and hid their rascality under high sounding phrases. These investigations have also disclosed the source of enormous campaign funds which have seen used to debauch elections and corrupt the ballot of the people, so now they can see what they should have seen before, namely, that no party can exterminate the trusts so long as it owes its political necess to campaign contributions secured from trusts.

I think it is safe to say that at presmount issue in the minds of a large majority of the people is the trust issue. I congratulate President Roosevelt upon the steps which he has taken to enforce the anti-trust law, and my congratulation is not lessened by the fact that he has followed the Democratic rather than the Republican platform in every advance he has made. The trouble is that the Republican party is not in a position to apply effective and thorough going reforms because it has built up, through special legislation, the very

abuses which need to be eradicated. Before any intelligent action can be taken against the trusts we must have a definition of a trust. Because no corneration has an absolute and complete monopoly of any imporatnt product, the apologists for the trusts sometimes insist ple of the several nations are afraid that | that there are in reality no trusts. Others insist that it is impossible to legislate against such trusts as may exist without doing injury to legitimate business. For the purpose of this discussion it is sufficient to draw the line at the point where competition ceases to be effective and to designate as a trust any corporation which controls so much of the product of any article that it can fix the terms and conditions of sale. Trusts and Monopolies.

Legislation which prevents a monopoly not only does not injure legitimate business, but actually protects legitimate husiness from injury. We are indebted to the your er Rockefeller for an illustration which makes this distinction In defending the trust system he clear. is quoted as saying that as the American beauty rose can not be brought to perfection without pinching off 99 buds, so that the one-hundredth bud can receive the full strength of the bush, so great industrial organizations are impossible without the elimination of the smaller ones. It is a cruel illustration, but it puts a perfectly accurate picture of trust methods. The Democratic party cham-pions the cause of the 99 enterprises which are menaced; they must not be sacrificed that one great combination

may flourish. There must be no mistaking of the is sue and no confusion of the line of hattle The trust as an institution will have few open defenders. The policy of the trust magnates will be to insist upon "reasonable legislation." and then thoy will rely upon their power to corrupt legislators and intimidate executives to prevent the application of any remedies which would interfere with the trusts. Our motion must be: "A private monopoly is inde-fensible and intolerable," and our plan of attack must contemplate the total and complete overthrow of the monopoly

principle in industry.

We need not nuarrel over remedia-We must show ourselves willing to support any remedy which promises sub stantial advantages to the people in their warfare against monopoly. Something is to be expected from the enforcement of the criminal clause of the Sherman antitrust law, but this law must be enforced not against a few trusts as at present. but against all trusts, and the aim must be to imprison the guilty, not merely to recover a fine. But it is not sufficient to enforce existing laws. If 10 corporations conspiring together in restraint of trade are threatened with punishment, all | that a majority of my own party favor they have to do now is to dissolve their It, but I believe that an increasing numreparate corporations and turn their property over to a new corporation. The public ownership the sure remedy for disnew corporation can proceed to do the same thing that the separate corporation

We need, therefore, new legislation and Believing, however, that the operation of the Republican party not only fails to en-act such legislation, but fails even to ment would result in a centralization The Democratic party must be prepared to propose new and efficient. I prefer to see only the trunk lines oper-

Recent investigations have brought to local lines by the several state governlight that nearly all crookedness revealed ments. Some have opposed this dual in the management of our large corpora- ownership as impracticable, but investitions has been due to the duplication of gation in Europe has convinced me that directorates. A group of men organized it is entirely practicable. Nearly all the and obtained control of several corpora- railroads of Germany are owned by the tions doing business with each other, and then proceeded to swindle the stockholders of the various orporations for which traffic is in no wise obstructed. they acted. No man can serve two masters, and the director who attempts to de so will fail, no matter how much money he makes before his failure is discovered. Many of the trusts control prices by the same methods. The same group of men build connecting canals in order secure control of several competing corporations and the management is thus half of the year we can build a railroad and cheapen rates the whole year; if we consolidated. It is worth while to consider whether a blow may not be struck at the trusts by a law making it illegal Panama canal to lower transcontinental for the same person to act as director or rates, we can build a railroad from New officer of two corporations which deal with each other or are engaged in the same general business.

Suggests Another Remedy. A still more far-reaching remedy was proposed by the Democratic platform of 1900, namely, the requiring of corporations to make out a federal license before engaging in interstate commerce. This

remedy is simple, easily applied and comprehensive. The requiring of a lice use would not embarrass the legitimate corporations-it would scarcely inconvemence them-while it would confine the predatory corporations to the state of their origin. If corporations were required to take a federal license the federal government could then issue the license

TOM L. JOHNSON Cleveland, Who Introduced Mayor William J. Bryan.

upon the terms and conditions which would protect the public. The control which congress has over interstate commerce is complete, and if congress can prevent the transportation of a lottery licket through the mails by the express companies or by freight, it can certainly forbid the use of the mails, the railways and the telegraphs to any corporation which is endeavoring to monopolize an article of commerce. It is far easier to prevent a monopoly than to watch and to punish it, and thus prevention can be accomplished in a practical way by refusing a license to any corporation which controls more than a certain proportion of the total product-this proportion to be arbitrarily fixed at a point which will give free operation to competition.

The tariff question is very closely allied to the trust question, and the reduction of the tariff furnishes an easy means of limiting the extortion which the trusts | pared to administer heroic treatment. can practice. While absolute free trade The Democratic party offers a solution would not necessarily make a trust in- which is both reasonable and adequatepossible, still it is probable that very fer a solution in which time honored princinanufacturing establishments would dare to enter into the trust if the president were empowered to put on the free list of property or of property rights; it is articles competing with those convolled on the contrary, the best defender of by a trust. The principle embodied in both, because it defends human rights, ne protective tariff has been the fruitful and human rights are the only foundation source of a great deal of political corruption, as well as the support of many of can rest securely. The Democratic party | Tom-Well? our most iniquitous trusts. But one of does not menace a single dollar legitithe worst features of the tariff levied mately accumulated; on the contrary it not for the revenue, but for the avowed insists upon the protection of rich and purpose of protection, is that it fosters the idea that manufacturers should use they have honestly earned. The Demotheir votes to advance their own financial cratic party does not discourage thrift, interests. The manufacturers have been but on the contrary stimulates each inassured that it is legitimate for him to dividual to the highest endeavor by asvote for congressmen who, whatever their opinion on other subjects may be, of the fruits of his toil. If we can but will legislate larger dividends into their repeal the laws which enable men to reap pockets; sheep growers have been, on-eouraged to believe that they should have enable them to garner into their overno higher aim in voting than to raise the flowing barns the harvests that belong to price of wool, and laboring men have been urged to make their wages their enough to make his fortune dangerous to only concern. With the public conscience educated to believe that this open purchase of legislation was entirely proper, these are the twin pillars upon which no wonder that insurance companies have plutocracy rests. To take away these used the money of their policyholders to supports and to elevate the beneficiaries carry elections-no wonder that trusts of special legislation to the path of honhave hastened to purchase immunity est effort ought to be the purpose of our from punishment with liberal donations. party. Tariff Reform.

There never was a time when tariff reform could be more easily entered upon, for the manufacturers, by selling abroad cheaper than at home, as many of them do, have not only shown their ingratitude toward those who built the tariff wail for them, but they have demonstrated their abillty to sell in competition with the world. The high tariff has long been a hurden to the consumers in the United States, and it is growing more and more

a menace to our foreign commerce. The railroad question is also interwoven with the trust question. Nearly all the private monopolies have received rebates or secured other advantages over competitors. Absolute equality of treatment at the hands of the railroads would go far toward crippling the trusts, and I rejoice that the president has had the courage to press the question upon con-While the law, as it was finally distorted by the senate, is not all that could be wished, it deserves a fair trial. Rate legislation was absolutely necessary and it furnishes some relief from the unbearable conditions which previously existed; but we must not forget that the vesting of this enormous power in the in the name of business honor which it hands of the commission appointed by the president introduces a new danger. If an appointive board has the power to fix rates and can, by the exercise of that | power, increase or decrease by hundreds of millions of dollars the annual revenues of the railroads, will not the railroads feel that they have a large pecuniary interest in the election of a president

friendly to the railroads? I have already reached the conclusion that railroads partake so much of the nature of a monopoly that they must ultimately become public property, and be managed by public officials in the interest of the whole community, in accordance with the well defined theory that public ownership is necessary competition is impossible. i do not know ber of the members of all parties see in priminations between persons and polilies, and for the extertionate rates for broadest sense. In the United States this at empted, and yet not violate the law. the carrying of freight and passengers.

LAKE OF QUICKSILVER.

Remarkable Discovery Made In

Mountains of Vera Crus. A lake of quicksilver, covering an area of more than three acres and having a depth ranging from 10 to 50 feet, has been discovered in the mountains of the state of Vera Cruz, says a dispatch from Mexico City, Mexico, to the New York World. The value of the product is estimated at many

millions of dollars. The news of this discovery was brought to Mexico City by C. A. Bung1, a reputable mining man, who declared he was suffering from mercurial poisoning from having spent much time investigating the extent of the lake and coming in contact with the quicksilver. He went to Santa Rosalia Springs, in the state of Chihuahua, * where he took a course of treatment for his ailment. He returned to Mexico City fully restored in health.

Mr. Bungi interested F. Lagerwall, a wealthy iron manufacturer of Sweden. who is now in Mexico on business, and J. B. Feelin of New York, who accompanied Bungi to the state of Vera Cruz and proved the truth of his discovery.

This lake of quicksilver has been known to the Indians of that locality for many generations. It is situated far up in the mountains in an almost inaccessible position. Its surfaco is partly covered by stones. It is believed that volcanic action in the mountains above smelted the quicksilver out of the cinnabar ore and that it ran down and filled this depression.

Lagerwall and Feelin have agreed to provide the capital for the operation of the rich find. A tunnel will be driven through the base of the mountain and the quicksilver will be brought down by means of gravity.

SURGERY ON THE RAILS.

Erie Railroad Has a Complete Hospital on Wheels.

In car 1099 the Erie railroad has added a complete hospital on wheels to its equipment, says the New York Herald. It is provided for use when in case of an accident passengers or employees are injured and the nearest hospital is so far away that operations on the spot become necessary.

Divided into two compartments, the sixty foot car has an operating room fifteen feet ten inches in length, equipped with an Isaacs operating table, with a movable head and foot extension, an instrument sterilizer on the right and a surgeon's basin on the left. The car also has two lockers equipped with surgleal instruments and stocked with bandages, plasters, sponges, anaesthetics, antiseptics, astringents and

other medical and surgical necessities. Four foot slide doors in either side, with portable steps, permit of an easy entrance with a stretcher to the room, which has ten side windows and a large window in the roof over the operating table. All are of ground glass and provided with white rubber roller curtains. Two four flame acetylene gaslights and two smaller ones furnish light at night. A gravity water system to furnish both hot and cold water can be regulated by a surgeon with a valve

operated by the foot. Two sliding doors with ground glass windows lead to the ward room, fortythree feet four inches in length, equip ped with eleven brass bedsteads and a lavatory and saloon. Boxes under the ear carry crutches, splints, army stretchers, surgical implements, wrecking tools and other accessories. The car rests on six wheel trucks.

"BIG STICK'S" JOURNEY.

Unique Package Traveling Through Country to White House. Express offices are on the lookout for

a "deadhead" package labeled "Roose velt's big stick," which is going around the country, to the great delight of jokers. Attached to the "big stick" are about 200 labels bearing various inscriptions from different cities in Iowa, Michigan, Ohio, Missouri, Texas and Colorado. The package is now beaded for the eastern states, and will ultimately end its journey at the White House, says the Chicago Tribune. Au agent of the United States Express company at Des Moines started the article on its travels.

An inscription written by a Sioux City man says: "With a big stick like Teddy's and

plenty of room to swing it, O gee!" Another label contains the following appeal: "Teddy, hold your big stick over

Russia and protect the Jews from being murdered in cold blood." An Iowa man has written the follow-

ing on a label bearing a Grinnell date: "May we always have as good a man for this big stick."

Coal us an Ornament.

Coal as an ornament in jeweny is being used in Japan. According to the Horological Journal, only the hardest and most perfect of the bits are used. and the workers in coal from whom the jewclers obtain their supply make a practice of saving for them certain pieces, often not more than two or three of the required quality being found each day. Of course this black diamond jewelry is very inexpensive, but at the same time it is pretty and a

Novel Use For Car Hammocks. Passengers traveling with infants in sleeping cars have found a novel use for the little hammock that is swung in all berths and which was originally intended as a receptacle for small articles of clothing, etc. Parents are now insuring a good night's rest for themselves and little one by putting the baby to sleep in the hammock. This procedure is practicable for all infants under one year of age and is the only absolutely safe sleeping place for them الجماعين يواريون

novelty as well.
